Introduction:

This document presents an analysis of the **Graduating Senior Survey**, given May 10, 1997 prior to Graduation Exercises. Usable responses were obtained from 924 students. Each student was asked to respond to 48 questions on the survey. In addition, students were asked to provide information about employment plans and their future address.

The **Graduating Senior Survey** was developed by:

Reinhold Bubser	Professor and Associate Dean, Modern Languages
Cindy Carlson	Administrative Assistant, Executive Assistant to the President
Bill DeBrito	Coordinator of Institutional Research
Brad Halverson	Assistant Director, Alumni Relations
Bob Kramer	Associate Director, Center of Social and Behavioral Research
Gene Lutz	Director, Center of Social and Behavioral Research
Mike Mixsell	Director, Human Resource Services
Renee Romano	Director, Maucker Union
Pat Geadelmann	Executive Assistant, Director of External Relations

Methodology:

The information provided by the students was entered into a database. Demographic information was then obtained from Information Technology Services and matched with the file containing student responses to the survey. Data were then analyzed to show patterns of response by various groups. These included: College of major, Transfer status and Ethnicity. Each Group was then subdivided to contrast male/female response.

Cautionary Note:

The student responses presented in this analysis should be considered to be indicative of potential issues rather than definitive statements. As such, all the responses and the comments presented should be examined in the total context of individual Colleges and Departments. Limitations inherent in the mode of data collection should also be noted. None-the-less, it is the hope of the authors of the study that others will perform additional research on the issues raised in order to improve the total educational experience of students at the University of Northern Iowa.

Results:

Table I provides some general observations on the survey. These observations are intended to stimulate further examination and thought. Table II presents a summary of responses to individual items.

Table III presents a commentary on **differences** in average responses found within various groups. This commentary is intended to draw the reader's attention to various patterns but is not meant to exclude the presence of other patterns or relationships. Items with relatively large differences in agreement were cited but were typically limited to three or less observations per item. The number of individuals in the sub-groups was considered but an absolute standard was not used. Thus the comments in this Table should be considered a starting point rather than definitive. Please note also that the level of average responses, as well as differences in average response, may indicate issues for further analysis.

Finally, a detailed analysis of each of the 48 items on the survey is presented. Differences in the average responses of Males and Females are highlighted, as are differences in the average responses found within categories.
